WORK EXPERIENCE

Software Engineer

Infosys Ltd

01/2022 - 12/2023

Description

- Built UI components for events management and Goals feature for an edtech website using **React.js**
- Implemented user registration, waiting list, attendance, and filter-by-date operations.
- Achieved a **30% reduction** in development time, by creating reusable components and custom hooks. Ensured software integrity through regression testing.

PROJECTS

1. Dream Canvas [🔗](#)

- Developed an AI image-enhancing app that offers advanced image customization features. Built using **Cloudinary AI** for image transformation, and **Clerk** for user.
- Introduced payments & credits system using **Stripe** and persisted the transformed image in **MongoDB** database. Engineered next **server actions** for storing users.
- **Skills:** Next.js, TypeScript, MongoDB, TailwindCSS, RHF, ShadCN, Webhooks
- **Live:** <https://dream-canvas-psi.vercel.app/>

2. Beyoung Store [🔗](#)

- Created a fully functional and responsive eCommerce website. Implemented **login**, product **search**, **filter**, **infinite scroll pagination**, add to **cart**, **wishlist**, and checkout functionality.
- Enabled **protected routes** accessible only for logged-in users, with **JWT token** in local storage.
- **Skills:** React, JavaScript, TailwindCSS, Vite
- **Live:** <https://beyoung-store-clone.netlify.app/>

3. 3D Portfolio [🔗](#)

- Built an interactive portfolio using **animation libraries**.
- Integrated **EmailJS** for automating the email sending process.
- **Skills:** React, React Fiber, Three.js
- **Live:** <https://ravi-anand04.netlify.app/>

4. Cleartrip Clone [🔗](#)

- Built a **fully responsive** Flight and hotel booking website
- Implemented search **autocomplete**, **filter**, and **sort** functionality for flights/hotels. Enabled account **login** by persisting **JWT** token in **localStorage**.
- **Live:** <https://cleartrip-booking-clone.netlify.app/>
